

"My mother was a patient of Courtyard Care Center and I just can't muster up enough words to describe my satisfaction with the care she received. My wife and I visited Courtyard regularly giving us the opportunity to observe not only how my mother was treated but the care given to others as well. We were amazed at the quality of care they received. I observed the daily progress my 99 year old mother made by the competent physical therapy department's encouraging remarks and applied physical care given her. She was unable to walk when admitted from the hospital, but within 25 days she was able to walk well enough to go back to her assisted care retirement home where she lives a relatively normal life with limited care."

Sincerely yours,
Ira Orenstein

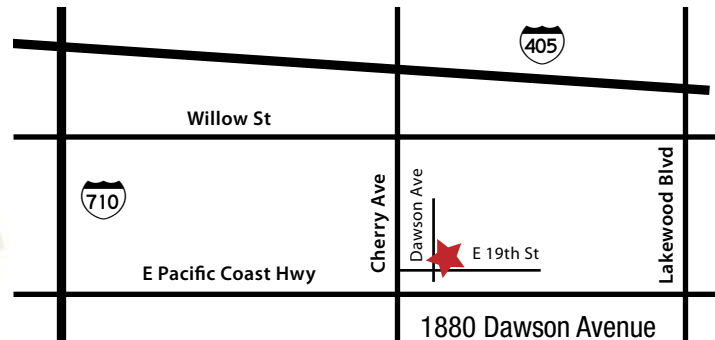

"I wanted to write and let you know that my family and I were very pleased with the care that our mother received at your facility. The care that she received was very professional, caring and overall exceptional. Our mother was recovering from surgery and needed some very special care along with physical rehabilitation. She was treated with respect and compassion by all the staff. The nursing staff was exceptional in the care of her incision until it was completely healed. The physical therapy department did an outstanding job of rebuilding her strength and endurance. She has been able to return home and resume her normal activities. If the need should arise again for post surgery care or rehabilitation our family would not hesitate to choose Courtyard Care Center."

Sincerely,
Linda Clark
